### Sample Analysis Dashboard moving to Power BI

[Monksleigh](#) is really pleased to announce that the Sample Analysis Dashboard is moving to Power BI. This new platform is more intuitive, more flexible and will allow us to store and manipulate more sample analysis data, and give you an in-depth evaluation at the click of a button, relieving your work load and expediting your assessment.

For more information regarding our Sample Analysis Dashboard, contact us via email at [info@monksleigh.com](mailto:info@monksleigh.com), or visit [our website](#).

### Existing Dashboard clients moving to Power BI.

We are in the process of transferring our existing Sample Analysis Dashboard clients to the new platform on Power BI. We are hoping to get some feedback from them very soon to be able to share it with you and further improve the system.

To discuss how our Dashboard and Sample Analysis Service could benefit your company, contact us at [info@monksleigh.com](mailto:info@monksleigh.com), or visit [our website](#).

### Future EFW Capacity - Is Import a Possibility?

After a lot of debate concerning the possibility of a moratorium on EfW capacity in England, it looks like there is a real possibility of EfW over-capacity by 2042.

We believe that if we don't have enough residual waste of our own, importing it to fill spare capacity becomes more and more likely.

## Plastics - why ban the exports?

Why place a ban on the export of plastic? Arguably, it would be very difficult to implement, even on a phased basis as recently suggested by WRAP? It strikes us that bans always have unintended consequences and that maybe there are a number of alternatives to a ban, whether phased-in or otherwise. . [Read more](#)

## What About Waste Imports?

Whilst a great deal of focus is on reducing exports and providing infrastructure in the UK to facilitate this, there is already a pattern emerging within the UK of increasing imports of waste which are not being considered. [Read more...](#)

## Residual Waste to be halved by 2042

Defra finally published its update to the Environment Improvement Plan (EIP) on 1st February 2023. Its main targets and commitments include halving residual waste produced per person by 2042 and the elimination of avoidable waste by 2050.

Monksleigh can help you understand the ramifications and impact of these new targets. If you would like some advice or support, please contact us at [info@Monksleigh.com](mailto:info@Monksleigh.com) or visit our [website](#).
